- BTW (appointment)
- hyphen (/)
- appt (-)
- slash (by the way)
- at (@)
- underscore (.)
- dot (as soon as possible)

# What type of software do you use?

## Describe it.

- Example : **Autodesk Inventor** is 3D mechanical design software for creating 3D digital prototypes used for example in the design.
- Word
- Excell
- Others

# Fill the gaps – hypertext, interconnected, life, information, reach, worldwide, networks

- The Internet is a global system of \_\_\_\_\_ computer networks which connects billions of users \_\_\_\_\_. It consists of millions of private, public, academic, business, and government networks of local to global scope. Internet carries a lot of \_\_\_\_\_ resources and services, most notably the inter-linked \_\_\_\_\_ documents of the World Wide Web (WWW).
- The origins of the Internet \_\_\_\_\_ back to the 1960s when the United States funded research projects of its military agencies to build robust, fault-tolerant and distributed computer \_\_\_\_\_. Later, it led to the commercialization of an international network in the mid 1990s, and resulted in the following popularization of countless applications in virtually every aspect of modern human \_\_\_\_\_. As of 2009, an estimated quarter of Earth's population used the services of the Internet.

# Answer the questions in pairs

- What is a computer? Why do you use it?
- What are the main parts of a computer?
- What is the difference between hardware and software?
- What are peripherals?
- What are storage devices? Describe the most used.
- What do you need to be able to play PC games?
- What type of PC games are the most popular among your friends? Describe them.
- Is the Internet important for you? Why.
- Describe the advantages and disadvantages of the Internet.
- Describe the advantages and disadvantages of the social websites.

# Describe our school computer lab
